BASIC-ABSTRACT:

A process in which (1) a surface of plywood is coated with a sealing agent, (2) the coated surface is further coated with an oleo type of dye, (3) the resulting doubly coated surface of plywood is undercoated with a semi-transparent, colour paint, (4) artificial cavities are engraved on the coated surface by means of embossing roll, (5) a grain figure pattern of desirable species is printed on the resulting engraved surface (6) a finishing (semi)-transparent paint is coated on the printed grain figure patterns of the plywood surface, (7) a semi-transparent colour paint being free from compatible solubility with the finishing (semi)transparent paint is compressively fed into the artificial cavities and thereby the inside of the artificial cavities are colourfully painted and (8) treated plywood is dried.
